

Position Reference Tab Replacement Instructions

Replacement Kit part # 96834

Step 1

- Move the door in the "closed" position.

Step 2

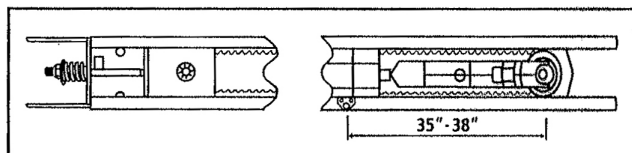

- Disconnect the operator from power.

Step 3

- To find the reference position tab location face towards the garage door while under the rail.

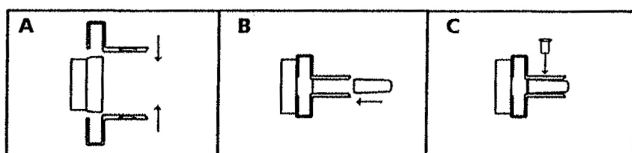

Step 4

- Measure and mark tab location (approximately 35"-38") from the motor shaft.

Step 5

- Attach the two clips to the belt (A), slide the position tab (B) and install the rivet (C).

Step 6

- With adjustable pliers crimp the rivet.

Step 7

- Connect the operator to power.

Step 8

- Reset "open" and "closed" door position as described in the owner's manual
