SG10 Stand Alone Drone Units

Recommended External Control:
Provide NO (Normally Open) or NC (Normally Closed) switch contacts to control RED & GREEN signals as desired.

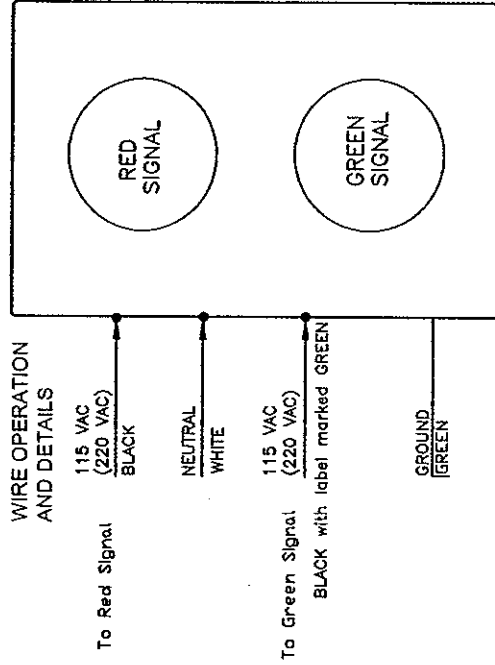

CAUTION: SG10's with incandescent lamps require a flashing power supply to avoid heat damage to the lenses.

NOTE: All LED models may operate in either steady burn or flashing modes.

NOTE: 24 Volt LED models require careful control of the input voltage to avoid premature failure. Insure that the voltage does not exceed 10% of rated voltage.

115 and 220 VAC MODELS

SG10(B)-115RG SG10(B)-115RG-LED
SG10(B)-220RG SG20(B)-220RG-LED

12 VDC and 24 VAC & VDC MODELS

SG10(B)-12RG SG10(B)-12RG-LED
SG10(B)-24RG SG10(B)-24RG-LED
